- 1.2 Procurement will be undertaken in compliance with the Public Procurement and Disposal of Public Assets Act, 2003 and Regulations, 2014.
- 1.3 The Instructions to Consultants (ITC) should be read in conjunction with the PDS. The subject and procurement reference number, and where applicable the number of lots of this Request for Proposals Document are provided in the PDS.
- 1.4 Throughout this Request for Proposals Document:
 - (a) the term “in writing” means communicated in written form with proof of receipt;
 - (b) if the context so requires, singular means plural and vice versa;
 - (c) “day” means working day, and “month” means working month.

2. Source of Funds

- 2.1 The Procuring and Disposing Entity has an approved budget from Government funds towards the cost of the procurement described in the PDS. The Procuring and Disposing Entity intends to use these funds to place a contract for which this Request for Proposals Document is issued.
- 2.2 Payments will be made directly by the Procuring and Disposing Entity and will be subject in all respects to the terms and conditions of the resulting contract placed by the Procuring and Disposing Entity.

3. Corrupt Practices

- 3.1 It is the Government of Uganda’s policy to require that Procuring and Disposing Entities, as well as Consultants, observe the highest standards of ethics during procurement and the execution of contracts. In pursuit of this policy, the Government of Uganda;
 - (a) defines, for the purposes of this provision, the terms set forth below as follows:
 - (i) “corrupt practice” means the offering, giving, receiving, or soliciting, directly or indirectly, of anything of value, to influence the action of a public official in the procurement process or in contract execution;
 - (ii) “fraudulent practice” is any act or omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a financial or other benefit or to avoid an obligation;
 - (iii) “collusive practice” is an arrangement between two or more parties designed to achieve an improper purpose, including to influence

- improperly the actions of another party;
 - (iv) “coercive practice” is impairing or harming, or threatening to impair or harm, directly or indirectly, any party or the property of the party to influence improperly the actions of a party;
 - (b) will reject a recommendation for award if it determines that the Consultant recommended for award has engaged in corrupt or fraudulent practices in competing for the Contract;
 - (c) will suspend a Consultant from engaging in any public procurement proceeding for a stated period of time, if it at any time determines that the Consultant has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government contract.
- 3.2 Furthermore, Consultants shall be aware of the provision stated in Sub Clause 15.1(g)-(h) and Sub Clause 2.2 of the General Conditions of Contract.
- 3.3 In pursuit of the policy defined in Sub-Clause 3.1, the Procuring and Disposing Entity may terminate a contract or be ordered by the Public Procurement and Disposal of Public Assets Appeals Tribunal to cancel a contract if it at any time determines that corrupt, fraudulent, collusive or coercive practices were engaged in by representatives of the Procuring and Disposing Entity or of a Consultant during the procurement or the execution of that contract.
- 3.4 In pursuit of the policy defined in Sub-clause 3.1, the Code of Ethical Conduct for Bidders and Providers as provided in the bidding forms shall be signed by the Bidder and submitted together with the other bidding forms. The Government of Uganda may suspend a Consultant from engaging in any public procurement or disposal process for a period determined by the Public Procurement and Disposal of Public Assets Authority (herein referred to as the Authority), where the Consultant is debarred from the procurement processes of an international agency of which Uganda is a member.
- 3.5 Any communications between a Consultant and the Procuring and Disposing Entity related to matters of alleged fraud or corruption must be made in writing and addressed to the Accounting Officer of the Procuring and Disposing Entity.

4. Eligible Consultants

- 4.1 A Consultant, and all parties constituting the Consultant, shall meet the following criteria to be eligible to participate in public procurement:
- (a) the Consultant has the legal capacity to enter into a contract;
 - (b) the Consultant is not:
 - (i) insolvent;
 - (ii) in receivership;
 - (iii) bankrupt; or
 - (iv) being wound up
 - (c) the Consultant’s business activities have not been suspended;
 - (d) the Consultant is not the subject of legal proceedings for any of the circumstances in (b); and
 - (e) the Consultant has fulfilled his or her obligations to pay taxes and social security contributions.

- 4.2 A Consultant may be a natural person, private entity, government-owned entity, subject to ITC Sub-Clause 4.6 or any combination of them with a formal intent to enter into an agreement or under an existing agreement in the form of a joint venture, consortium, or association. In the case of a joint venture, consortium, or association, unless otherwise specified in the PDS, all parties shall be jointly and severally liable. In the case of a consortium or association, the formal intent shall be by way of Memorandum of Understanding which shall be registered with the Registrar of documents if signed in Uganda or if signed outside Uganda, shall be notarized.
- 4.3 A Consultant, and all parties constituting the Consultant including sub-contractors and key professional staff, shall have the nationality of an eligible country, in accordance with Section 5, Eligible Countries. A Consultant shall be deemed to have the nationality of a country if the Consultant is a citizen or is constituted, or incorporated, and operates in conformity with the provisions of the laws of that country. This criterion shall also apply to the determination of the nationality of proposed subcontractors for any part of the Contract including related works or supplies.
- 4.4 A Consultant shall not have a conflict of interest, as defined in ITC Clause 5. All Consultants found to be in conflict of interest shall be disqualified.
- 4.5 A firm that is under a declaration of suspension by the Authority in accordance with ITC Clause 3.1 (c) or 3.4, at the date of the deadline for proposal submission or thereafter before contract signature, shall be disqualified.

- 4.7 Consultants shall provide such evidence of their continued eligibility satisfactory to the Procuring and Disposing Entity, as the Procuring and Disposing Entity shall reasonably request.

5. Conflict of Interest

- 5.1 Government policy requires that Consultants provide professional, objective, and impartial advice and at all times hold the Procuring and Disposing Entity's interests paramount, without any consideration for future work, and strictly avoid conflicts with other assignments or their own corporate interests. Consultants shall not be hired for any assignment that would be in conflict with their prior or current obligations to other Procuring and Disposing Entities, or that may place them in a position of not being able to carry out the assignment in the best interests of the Procuring and Disposing Entity.
- 5.2 A Consultant may be considered to have a conflict of interest with one or more parties in this procurement process, if they:
- (a) have controlling shareholders in common; or
 - (b) receive or have received any direct or indirect subsidy from any of them; or
 - (c) have the same legal representative for purposes of this proposal; or
 - (d) have a relationship with each other, directly or through common third parties, that puts them in a position to have access to information about or influence on the proposal of another Consultant, or influence the decisions of the Procuring and Disposing Entity regarding this procurement process;

or

- (e) submit more than one proposal in this procurement process. However, this does not limit the participation of subcontractors in more than one proposal, or as Consultants and subcontractors simultaneously; or
 - (f) have been engaged, or any of their affiliates have been engaged, by the Procuring and Disposing Entity to provide supplies or works for the same project : or
 - (g) may be in conflict with another of their, or their affiliates' assignments by performing this assignment.
- 5.3 Consultants hired to provide consultancy services for the preparation or implementation of a project, and any of their affiliates, shall be disqualified from subsequently providing supplies, works or services related to the initial assignment (other than a continuation of the Consultant's earlier consulting services) for the same project.
- 5.4 Consultants may be hired for downstream work, when continuity is essential, in which case this possibility shall be indicated in the PDS and the factors used for the selection of the consultant will take the likelihood of continuation into account. It will be the exclusive decision of the Procuring and Disposing Entity whether or not to have the downstream assignment carried out, and if it is carried out, which consultant will be hired for the purpose.
- 5.5 Any previous or ongoing participation in relation to the assignment by the Consultant, its professional staff, or its affiliates or associates under a contract with the Procuring and Disposing Entity or the Government of Uganda may result in rejection of the proposal. Consultants should clarify their situation in that respect with the Procuring and Disposing Entity before preparing the proposal.

- 10.2 The proposal, as well as all correspondence and documents relating to the proposal exchanged by the Consultant and the Procuring and Disposing Entity, shall be written in English.

11. Preparation of Proposals

- 11.1 Consultants are required to prepare and submit separate technical and financial proposals. The proposal submission method shall be a one stage-two envelope method, unless otherwise specified in the PDS. The one stage-two envelope submission method requires a Consultant to submit a single envelope containing two separately sealed envelopes, labelled technical and financial proposals which are opened on different dates at separate proposal openings.
- 11.2 A pre-proposal meeting will be held where indicated in the PDS. Attendance at the pre-proposal meeting is optional.

12. Joint Ventures, Associations and Sub-contracting

- 13.5 Alternative professional staff shall not be proposed, and only one curriculum vitae (CV) may be submitted for each position.

- 13.7 The Procuring and Disposing Entity will not consider substitutions unless both parties agree that undue delay in the procurement process makes such substitution unavoidable or that such changes are critical to meet the objectives of the assignment. If this is not the case and if it is established that key staff were offered in the proposal without confirming their availability, the proposal may be rejected.

14. Technical Proposal

- 14.1 The technical proposal shall provide the following information using the standard forms contained in Section 4, Proposal Forms:

15.5 The completed financial proposal forms will be used to compile the Breakdown of Contract Price in any resulting Agreement as adjusted if necessary during evaluation or negotiation. The Breakdown of Contract Price will determine prices for any additional Services or costs.

1. Introduction

The Water and Sanitation sector in Jinja District is desirous to carry out detailed design and construction supervision of piped water supply systems at Lumuli rural growth center in Butagaya subcounty in the financial year 2024/25. Jinja District water and sanitation sector focuses on the following core areas;

- a) Water Supply: Supply of piped water in RGCs through public, institutional and private connections.
- b) Sanitation: public sanitation facilities including hygiene education and promotion of innovative technologies
- c) Environment: Source catchments protection including some targeted campaigns against bad environmental practices (bush burning) and advocating for good practices (forestation, agro-forestry, soil erosion control, etc).

1.1. Overall Objectives.

- a) To improve the socio-economic situation and the opportunities for people living in Rural Growth Centres (RGC's) targeted by the project through:

- the provision of safe, adequate, reliable and accessible water supply
- the promotion of sanitation facilities

- b) To improve general health conditions through the reduction of water borne diseases in the targeted RGCs.

- c) Empower communities in the targeted Rural Growth Centres through the nature of the management of the Water Sanitation Facilities.

- high degree of community organization as prerequisite for construction.
- strong capacity building component for O&M of the installed facilities.

- d) To contribute to environmental protection through the use of appropriate technologies in water and sanitation interventions, such as renewable solar energy and ecological sanitation.

- e) To ensure that the gender issue is addressed in such a way that women are empowered and both sexes are involved as decision makers.

2. Objective of the Assignment

The overall objective of the assignment is to undertake a feasibility study, provision of an adequate water source for the piped water system and detailed designs for the construction of the works for water supply systems in Lumuli Rural growth center.

3. Scope of the Assignment

The scope of this consultancy services shall in general include the following tasks:

- Determine the anticipated demand for water supply and sanitation services taking into consideration gender issues over a horizon of 20 years by considering the population density in year 2049
- Conducting detailed assessment of the underground water resources potential to serve Lumuli RGC within a radius of at least 10km. Detailed hydro geological investigations shall be carried out. The underground water potential

investigations shall aid in the development of at most two potential water sources for both current and future water demand.

- Preparation of a feasibility and preliminary design for supplying safe and affordable water to Lumuli Rural Growth Centre in Butagaya subcounty to meet the demand over the planning horizons. Special consideration for low operation and maintenance costs compared to initial investment costs shall be made along the entire life cycle of the scheme.
- Conducting detailed engineering surveys from the underground production water source supply sources to aid in the identification of the optimal location, sizing and alignment of pipe lines and the location of the other infrastructure such as the reservoir, pump stations, treatment works, etc.
- Sitting, drilling, well development and casting of production well/s
- Assessing potential environmental impacts for the proposed water supply development and proposing mitigation measures.
- Preparation of detailed narrative engineering designs, technical specifications, bills of quantities, corresponding drawings and engineering cost estimates.

4. Activities

In order to meet the above stated objectives, the Consultant will carry out the services described below, and will work closely with Jinja district Water and Sanitation Sector. Jinja district Water and Sanitation Sector shall ensure the Consultant accesses all available relevant documents for the assignment.

4.1. Feasibility and Detailed Engineering Design Phase

- a) Detailed assessment of the water resources potential. The assessment shall include both detailed advanced hydro-geological investigations and hydrological analyses. The water resources potential shall aid in the identification of potential water sources for both current and future development. Carry out geophysical studies to establish areas of adequate groundwater potential within a radius of 5km that can supply water sufficiently to meet the demand. This task will involve use of advanced, specialised technology and/or techniques that facilitate drilling beyond the common drilling depths; drilling depths may be as deep as 100m and beyond.
- b) Carry out a baseline and socio-economic survey that fully addresses socio-economic status, gender, hygiene and sanitation of the beneficiaries and assess the ability to sustainably operate and manage the piped water supply system and public sanitation facilities. This includes household surveys, focal group discussions and key informant interviews. The Consultant shall work closely with the Assistant Water officer (mobilization) and Assistant Water officer (sanitation and hygiene) officer while executing this task.
- c) Determine the per capita consumption and the anticipated demand for water supply and sanitation services taking into consideration gender issues over a horizon of 20 and 25 years, revenue generation prospects and sustainability of the water supply and sanitation system. The 20 year horizon will be the basis of the proposed design while the 25 year period will help the consultant to forecast the likely long term possibilities in terms of developments, water demands and appropriate water sources in the rural growth center. This forecast shall enable the consultant to make an assessment of the nature of intervention(s) required, if any, on the designed water supply system after the expiry of the design horizon
- d) Assess the existing sanitation and hygiene situation in the rural growth center and propose a strategy and basic investment schedules for viable and sustainable

- public sanitation facilities. The Consultant shall prepare realistic proposals for investment in minimum public sanitation facilities with associated costs and operation and maintenance implications in accordance with the 'Strategy for Improved Sanitation and Hygiene in Rural growth centers'.
- e) Undertake a feasibility study and preliminary design for the water supply and the preliminary cost estimate for the system. The consultant shall consider both operation and maintenance costs. The consultant shall adequately demonstrate that the developed water supply design and sanitation system shall be sustainable.
 - f) Preparation of a preliminary design of preferred water supply to meet the demand over the planning horizon of 20 years. Rural growth center layouts, site surveys drawings and layouts of the proposed systems shall be prepared (soft and hard copy). Cost estimates for capital investment and operation and maintenance shall be prepared in accordance with normal requirements for funding.
 - g) A financial analysis shall be carried out to assess the financial viability of the proposed system. This will facilitate probable consideration for donor funding for development of the water supply and sanitation systems. A cost-benefit analysis shall be carried out and the net present value (NPV) and Financial Internal Rate of Return (FIRR) estimated to determine financial attractiveness. An economic analysis shall also be carried out to determine the best economic alternative. The Economic Rate of Return (EIRR) shall be estimated for each option and a comprehensive risk analysis, including sensitivity analysis carried out
 - h) Conduct detailed engineering surveys and design for the preferred and agreed upon water supply option to aid in the identification of the optimal location, sizing and alignment of pipe lines and the location of the other infrastructure such as the reservoir, pump stations, treatment works, etc and preparing all relevant engineering drawings required to implement the designed water supply and sanitation system. The drawings must include a detailed layout showing levels, contours and coordinates of all civil infrastructure such as the pump stations, storage tanks, water treatment works(if any), water office, chlorine dosing units, etc
 - i) Carry out comprehensive water quality analysis involving both physio-chemical and bacteriological tests and include appropriate treatment methods in design to be used with special consideration for minimizing operation and maintenance costs.
 - j) Prepare detailed hydraulic narrative engineering designs, technical specifications, bills of quantities, detailed engineering drawings and engineering cost estimates including tender documentation for preferred water supply option. The designs shall incorporate structural designs and steel bending schedules for all steel and/or reinforced concrete works. The Engineering Drawings shall be signed off and embossed with an official stamp of an engineer registered with the Engineers' Registration Board (ERB) in accordance with the Engineers Registration Act. The designs and tender documents will include the public sanitation facilities preferred. The tender dossiers shall be prepared for open tender procedure and unit price contracts and shall be in formats issued by the Public Procurement and Disposal Authority 2005.
 - k) Assess potential environmental impacts for the proposed water supply development and propose mitigation measures.

5.0 Reporting and Timeframe

5.1 Timeframe

The Consultant is expected to complete the design phase of this assignment **within six months** after contract award.

The commencement of construction work may be staggered depending on the availability of funds. The outputs for critical towns may be accelerated to fast track the commencement of works constructions.

5.2 Reporting
